

**Title:** What does Object.values() do?

**Answer:**

Object.values() ([https://developer.mozilla.org/en-US/docs/Web/JavaScript/Reference/Global\\_Objects/Object/values](https://developer.mozilla.org/en-US/docs/Web/JavaScript/Reference/Global_Objects/Object/values)) creates an array containing the values of an object.

```
// Initialize an object
const session = {
  id: 1,
  time: `26-July-2018`,
  device: 'mobile',
  browser: 'Chrome'
};

// Get all values of the object
const values = Object.values(session);

console.log(values);
```

**Output**

```
[1, "26-July-2018", "mobile", "Chrome"]
```

Object.keys() and Object.values() allow you to return the data from an object.
